

TRUFLEET® AVL SCHOOL BUS TRACKING SOLUTION

Allow parents and administrators to track school buses anytime, anywhere

The TruFleet School Bus Tracking Solution is a web-based application that allows school administrators and parents to track their children's school bus from a tablet, computer or mobile phone. TruFleet solution tracks Tallymatics Sprite Telematics devices (LTE-M cellular or 2-way radio-based) located in each school bus to provide real-time location data.

The web application provides parents with up to date information and real-time GPS coordinates of their children's school bus. Accounts are only available for parents and guardians and must be verified by the school board to ensure safety and security.

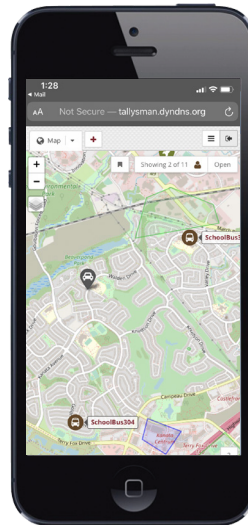

Keep Parents Informed and Children Safe

Whether at the office, in another city, or at home, parents have the ability to track their child's school bus from anywhere, at anytime.

Whether you're a member of the school's administration, a parent or guardian, this solution is built with everyone in mind. It ensures the safety and security of children while in the hands of the school board. Parents can now pull up the exact location of their child's bus in real-time to have a better idea of when they'll be home.

Key Features

- **Access the App Anytime.** Parents can track their child's school bus anytime via mobile phone, tablet or computer.
- **Track Multiple Routes.** Parents can track multiple buses if they have children on different routes.
- **School Board Authentication.** All new accounts must be verified by the school board to ensure student safety and security.
- **Know their Location.** Parents see the exact location of their child's bus in real-time.
- **Secure Portal.** The password-protected web app is only available for parents and guardians of students on verified routes.

Improve Situational Awareness

Enhance Monitoring & Auditing

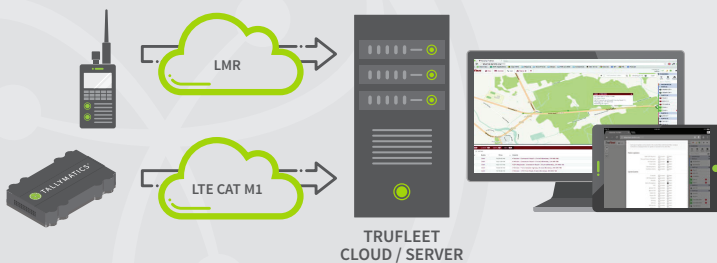

Enhance Safety

Improve Productivity

Reduce Operational Costs

TruFleet's AVL solution is an **integrated software application** installed on a server which tracks the location of Tallymatics Sprite Telematics devices (LTE-M cellular or 2-way radio-based). The School Bus Tracking Solution works with TruFleet to establish the coordinates of each school bus and its route.

TruFleet's hardware can be hosted locally or cloud-based with a low monthly fee.

About Tallymatics: Tallymatics manufactures high performance, telematics products and solutions for a wide range of applications. With support for both RF wireless and data networks, Tallymatics enables high-resolution location awareness of mobile field assets across any type of wireless network.
